Inclusion in Planning

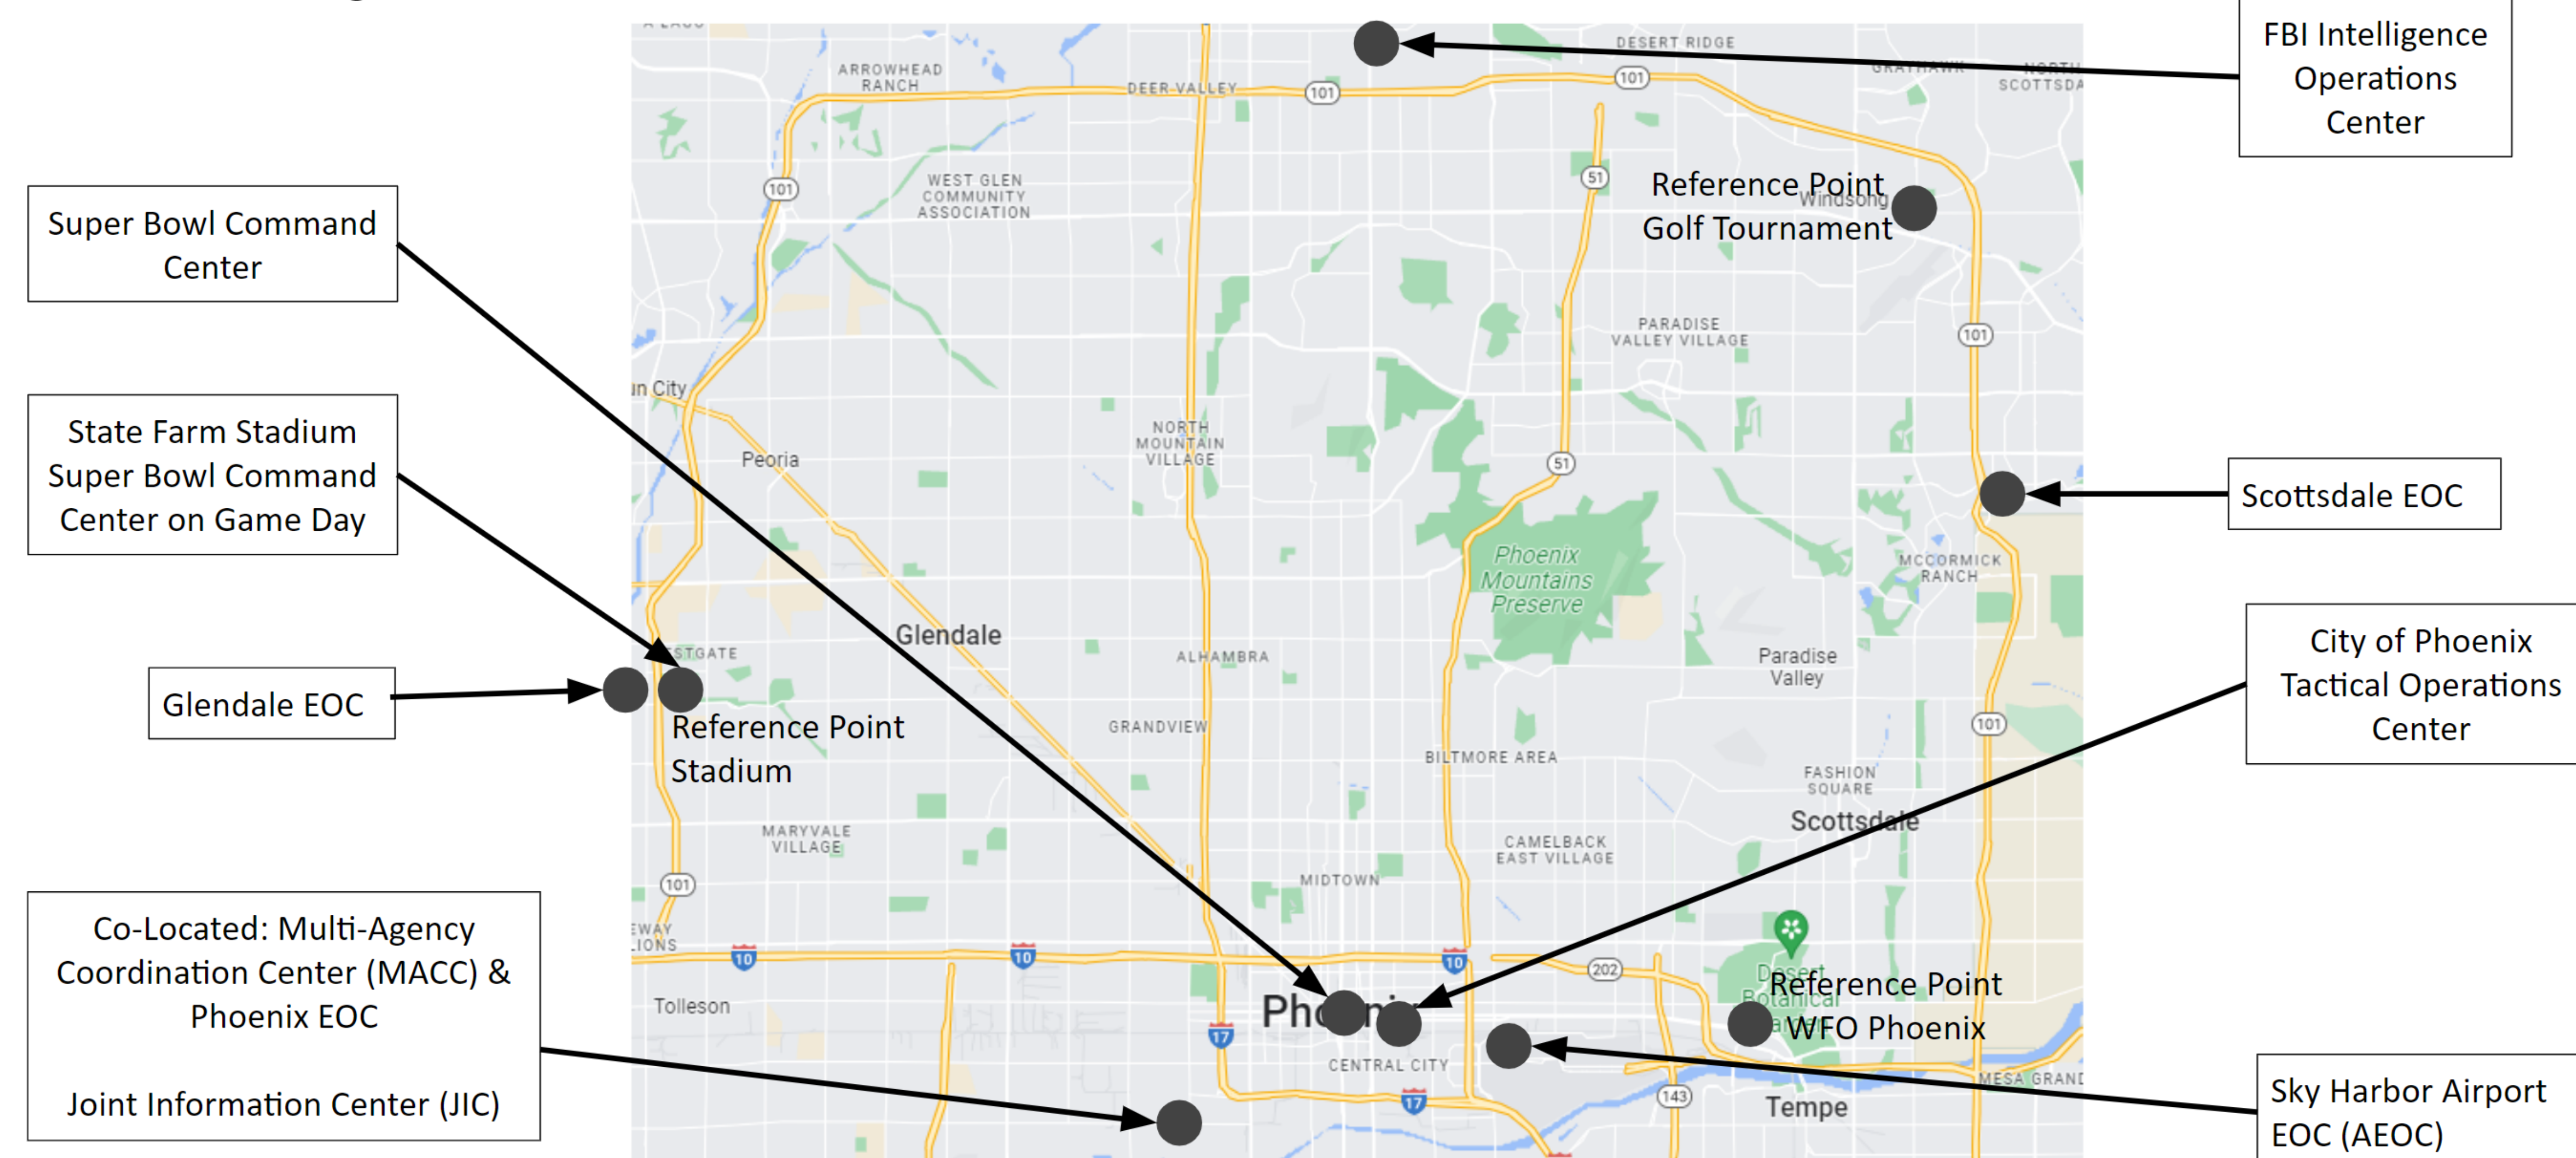

FBI Intelligence Operations Center

Eye to Eye with Decision Makers

Being present in the room allows NWS to be part of the conversation during briefings as well as informal discussions. We are able to quickly be called upon for any weather support needs rather than having to pick up the phone.

- Onsite Support Summary - 14 different people supporting the following from **WFOs Phoenix (5), Tucson (3), Flagstaff (3) and Las Vegas (3)**. Support started 2/3 and continued through 2/13 at various times at each location.

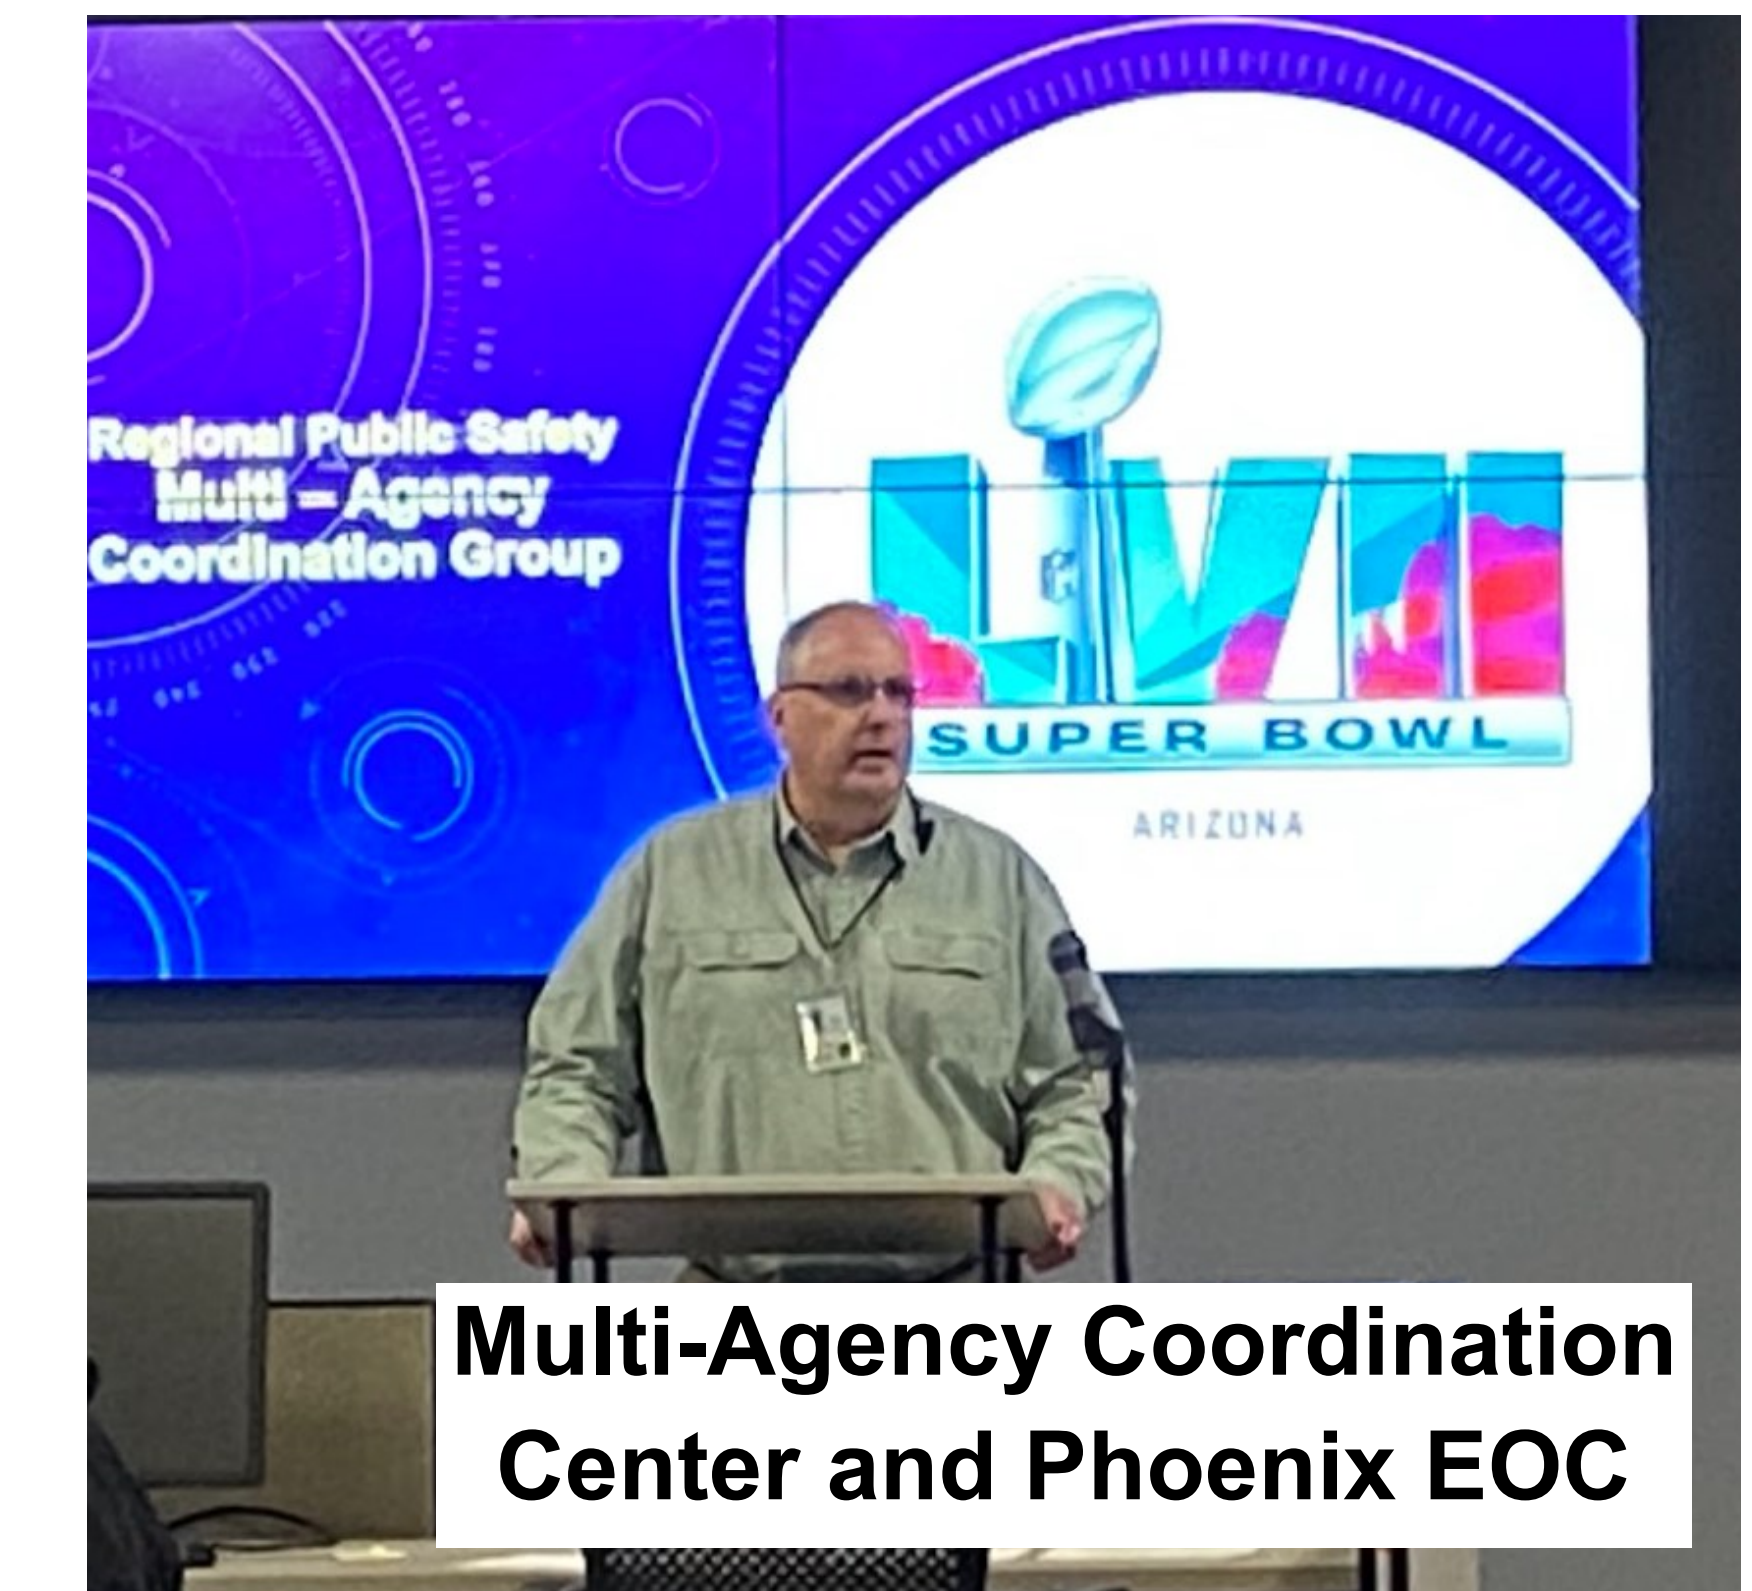

It is important to include NWS in planning process for any event, big or small. This ensures the NWS can build relationships with decision makers and speak to support capabilities for each area of the event.
