

The NWS is in Trouble

The FY24 Budget is BAD news for the NWS. The NWS was basically flatlined at FY23 funding levels, minus approximately \$5M in facilities repair and computing. This is HIGHLY concerning for Emergency Managers who rely on the NWS for forecasts, analysis, information, and, of course, severe weather watches and warnings to help protect the citizens and visitors to the United States. This is a LIFE SAFETY ISSUE!

FY24 Budget

Flatline Funding

IMPACTS

No new money for mandated salary increase

80-100 Vacant Jobs

Cuts to Facility Repairs and Computing

Equal to: \$45M Budget Reduction

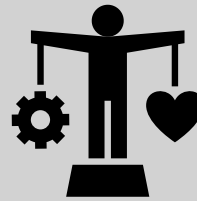

The Risks

System Outages

Alert Delays

Life Safety

Less support for FEMA, DoD, FAA

Call To Action:
INCREASE
FY25 NWS
Funding

FY23 NWS Budget:
Only \$1.3B
(\$4 per person a YEAR)
Same price as a CUP of COFFEE
