

DMP114 - Disaster Planning for Infrastructure Resiliency

June 8th from 10:00am-11:00am ET

Presented by: TEEEX

Course Description: This webinar will provide infrastructure stakeholders (whole community) an awareness level understanding of infrastructure asset types in our communities, and highlight applicable federal guidance for infrastructure systems planning. In order to contribute to your emergency preparedness programs and community resilience, the presenter will explain how to incorporate infrastructure disaster management planning into existing planning efforts by sharing best practices, methods, and practical experiences on disaster planning for infrastructure systems.

The class will be delivered on a WebEx platform and TEEEX will provide the login information prior to the class. Pre-registration is required through IAEM.

Preregistration is required with IAEM. Students will also need to complete the process of registering for the class with TEEEX by COB June 3rd, please go to:
