The Honorable Gary Peters
Chairman
Committee on Homeland Security
and Governmental Affairs
U.S. Senate
340 Dirksen Senate Office Building
Washington, DC 20510

The Honorable Rob Portman
Ranking Member
Committee on Homeland Security
and Governmental Affairs
U.S. Senate
340 Dirksen Senate Office Building
Washington, DC 20510

Dear Chairman Peters and Ranking Member Portman:

We, the undersigned organizations, write to express support for S. 3875, the Community Disaster Resilience Zones (CDRZ) Act of 2022. Collectively, our organizations represent a wide variety of constituencies, including business, conservation, emergency managers, housing, infrastructure, local government, public safety, science, and taxpayer organizations. We commend you for your bipartisan leadership and thank you for introducing the CDRZ Act. This bill is a critical, foundational step toward prioritizing and directing a whole-of-nation focus on the most vulnerable communities facing the risk of potentially life-threatening and economically devastating climate and natural disaster events.

The CDRZ Act would amend the Stafford Act to establish a statutory structure to identify and designate CDRZ communities that are the most in need and most at risk to natural hazards, such as hurricanes, flooding, earthquakes, and wildfires, to increase public and private sector investments in housing, infrastructure, and community-wide resilience. Building smart, modern, resilient infrastructure, including nature-based infrastructure, has long been among our top priorities. We support the CDRZ Act, which will:

- Amend the Stafford Act by adding a requirement that FEMA maintain and update products and tools that define natural hazard risk across the U.S. and use that dataset to identify and designate CDRZ communities that are the most in need and most at risk to natural hazards;
- Authorize the President to provide CDRZ-designated communities with assistance and funding for pre-disaster mitigation planning and projects to increase resilience against the identified hazards; and
- Help prioritize and attract additional public and private sector funding (including public-private partnerships) for resilience projects in or primarily benefitting CDRZ-designated communities.

We greatly appreciate your leadership, and we look forward to continuing to work with you and Congress to ensure our communities most threatened by climate and natural disaster risk and most economically vulnerable have the support, resources, and opportunities they need to improve their resilience.

Sincerely,
