

## **Driving Decisions Using Weather Data**

March 24<sup>th</sup> from 1:00pm-2:00pm ET

Presented by: **Jeff Jumper**, PA Emergency Management Agency State Meteorologist

**Presentation Abstract:** Weather and emergency management go hand in hand, but can you leverage weather data to help drive your decision making in planning and preparedness? In this presentation, we'll discuss how the emergency manager can put weather data to work to guide decision-making using real-world events. After this presentation, the attendee will be able to review their weather-related decision process to make more informed decisions based on weather data.

**Speaker Bio:** Jeff Jumper has worked as the PA Emergency Management Agency state meteorologist since 2015. Previously, he worked for a decade as a broadcast meteorologist at TV stations across the country. Jeff is a 20+ year volunteer firefighter/EMT. He holds degrees in Meteorology from Penn State and Emergency Management from Millersville. Jeff is an adjunct faculty member for Millersville and Jefferson Universities.
