

MGT 342-Strategic Overview of Disaster Management for Water and Wastewater Utilities

MUST be a U.S. Citizen per U.S. DHS rules or properly vetted through DHS.

Pre-Registration Required with IAEM and TEEEX

Registration Deadline – **April 17, 2023**

Registrants will receive a separate URL link from TEEEX to access this training outside the IAEM virtual conference platform.

The Strategic Overview of Disaster Management for Water and Wastewater Utilities course provides critical guidance when planning for and responding to disasters that affect drinking water and wastewater systems. Participants will be introduced to the various natural and man-made (accidental or intentional) disasters to which water and wastewater systems may be vulnerable and the potential effects of disasters. Participants will be guided through portions of the Environmental Protection Agency's (EPA) Response Protocol Toolbox (RPTB) to identify steps in the response and recovery processes. Case studies on a variety of disaster incidents, as well as hypothetical situations for water and wastewater incidents are examined. Participants are also given the opportunity to practice developing a disaster response plan for a disaster.

Course Topics

- Water and Wastewater System Vulnerability, Response and Recovery Process
- Threats to Water and Wastewater Utilities
- Preparing For and Responding To Disasters Affecting Water and Wastewater Utilities

A FEMA Student Identification (SID) number is required. Obtain your SID at <https://cdp.dhs.gov/FEMASID>

4 hrs.: Fri. 4/21, 10:00am – 2:00pm, Minimum Participation 20, Maximum Participation 35

Training Provider - TEEEX

Fee: Complimentary for registered attendees
