

Since 2021, Frank Pace has been leading the Hawai`i Office of Homeland Security (OHS) as its Administrator. His role encompasses oversight of planning and operations, grants management, the Hawaii State Fusion Center, and statewide interoperable communications. During his tenure, Frank has overseen the development and implementation of key strategies in State Homeland Security and Targeted Violence Prevention, as well as the enhancement of Cybersecurity and Critical Infrastructure Protection.

Notably, Frank has directed an extensive expansion of the Hawaii State Fusion Center's operational capabilities. He successfully led a statewide initiative to combat disinformation and improve information transparency, proving particularly crucial during the Maui wildfires in 2023. These efforts reflected the dedication of the entire OHS team to strengthening Hawaii's security and resilience.

He is currently the chair of the Governors Homeland Security Advisors Council (GHSAC). The Council serves as a forum through which state homeland security advisors can share information and expertise, discuss priorities setting and collaborate on strategic planning to address all hazards and threats facing the states.
