63rd IAEM Annual Conference & EMEX

NOVEMBER 13–18, 2015

PARIS HOTEL • CLARK COUNTY, NV

**Expanding the Spectrum  
of Emergency Management**

# NOW, *more than ever*

## **The CEM®/AEM® Exam Prep Course**

### **Course Goal:**

The goal of this course is to introduce emergency management personnel to the Certified Emergency Manager (CEM®)/Associate Emergency Manager (AEM®) program requirements and help them assess their qualification for the credential. It includes:

- Review of Certified Emergency Manager and Associate Emergency Manager program requirements (experience, education, professional contributions and more);
- Application procedures;
- Tips for successful program completion;
- Overview of the CEM®/AEM® exam;
- Standards upon which the exam is based;
- Sample exam questions; and
- A Q&A period.

### **Target Audience:**

- The CEM®/AEM® Exam Prep Course is intended for professional emergency managers interested in obtaining the Certified Emergency Manager (CEM®) or Associate Emergency Manager (AEM®) designation.
- A Certified Emergency Manager is an individual who possesses the knowledge, skills and abilities to effectively manage a comprehensive disaster/emergency management program.
- That program can be in, but is not limited to, government, business and industry, military, health care or educational institutions.

### **CEM®/AEM® Prep Course Schedule:**

- **CEM®/AEM® Prep Course and Exam**
  - > Sunday, November 15, 2015 at the IAEM USA 63rd Annual Conference & EMEX 2015, Clark County, NV
  - > Wednesday, February 24, 2016 at EMS Today 2015, Baltimore, MD

**Please see details at:

#### ***The Initiative for Resiliency in Energy through Vehicles: Using Alternative Fuel Vehicles for Emergency Response***

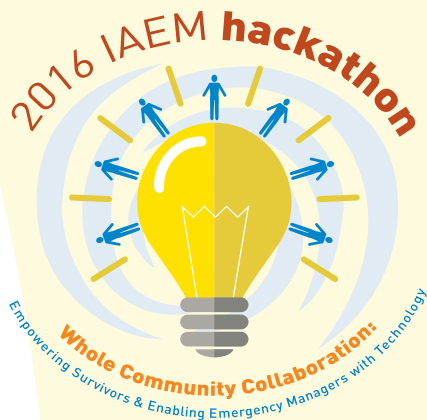

Presented by: Cassie Powers, National Association of State Energy Officials

Alternative fuel vehicles (such as natural gas trucks) are valuable assets when gasoline is in short supply during and after a disaster. This presentation will demo a new, cloud-based tool that emergency managers can use to locate alternative fuel vehicles in their jurisdictions, and incorporate these vehicles into their emergency planning exercises.

IAEM is excited to announce the

# Whole Community Collaboration Hackathon

sponsored by 

## What is a Hackathon?

A hackathon is a great way to deliver innovative solutions to difficult problems for emergency managers and survivors in a creative way. Scheduled over one weekend, teams, comprised of developers, project managers, graphic designers and others, join together to focus on building an application that provides a solution to a problem that is focused on the hackathon's theme. Additionally, this hackathon will be unique in that we will pair teams with emergency managers as they work to provide additional perspective. At the end of the event, teams are judged by a panel that includes experts in both technology and emergency management.

## Why a Hackathon?

First and foremost, it is an exciting way to create innovative new solutions to support the emergency management community. It will also develop technologists currently in the field and engage a new group of technologist to the community and the issues that the community faces mitigating, responding to and recovering from disasters.

**What is the theme?** The theme for this year is “Whole Community Collaboration: Empowering Survivors & Enabling Emergency Managers with Technology.” Selected by the IAEM–USA Hackathon Task Force, the theme is focused on engaging technologies around survivors and emergency managers and closing the information loop between the two during and after a disaster.

**How can I get involved?** While at the conference, stop by the Crisis Technology Center, Booth 603, and offer your ideas on some specific issues that can support the theme of Whole Community Collaboration: Empowering Survivors & Enabling Emergency Managers with Technology! Put your thought on our Idea Wall, ask questions and find out more information!

After the conference, join us for prep events, volunteer at a site, spread the word or create a team!

Scheduled for the first weekend in April 2016, the Hackathon will bring together emergency management and technology experts to build creative solutions focused on empowering survivors and enabling emergency managers with technology.

**#IAEMhack**

**DATE:** Friday, April 1, 2016 – Sunday, April 3, 2016  
**LOCATIONS\*:** Metropolitan DC, California, and Texas.

## Emergency Management Accreditation Program

Jessica Byrskin • 859-244-8066  
jbyrski@csg.org

EMAP is the only accreditation process for emergency management programs. The accreditation process revolutionizes programs that coordinate preparedness and response activities for disasters based on certified standards; thus recognizing the ability of programs to bring together personnel and resources from a variety of organizations in preparation for an emergency. The Emergency Management Standard is flexible in design providing a measurement of the capabilities to programs of different sizes, populations, risks and resources.

Nova Southeastern University offers a master of science in disaster and emergency preparedness. As disasters continue to occur and become more complex, so also has the planning, mitigation, and response. The problems faced by today’s emergency managers are more complicated. As such, the need for professionals who can manage these large and multifaceted incidents has become more important than ever before. Become a leader with your online degree in Disaster and Emergency Preparedness from NSU.
