NOW, *more than ever*

The AEM®/CEM® Preparatory Course

Course Goal:

The goal of this course is to introduce emergency management personnel to the Associate Emergency Manager (AEM®)/ Certified Emergency Manager (CEM®) program requirements and help them assess their qualification for the credential. It includes:

- Review of Associate Emergency Manager and Certified Emergency Manager program requirements (experience, education, professional contributions and more);
- Application procedures;
- Tips for successful program completion;
- Overview of the AEM®/CEM® exam;
- Standards upon which the exam is based;
- Sample exam questions; and
- A Q&A period.

Target Audience:

- The AEM®/CEM® Preparatory Course is intended for professional emergency managers interested in obtaining the Associate Emergency Manager (AEM®) or Certified Emergency Manager (CEM®) designation.
- A Certified Emergency Manager is an individual who possesses the knowledge, skills and abilities to effectively manage a comprehensive disaster/emergency management program.
- That program can be in, but is not limited to, government, business and industry, military, health care, or educational institutions.

AEM®/CEM® Preparatory Course Schedule:

- **AEM®/CEM® Preparatory Course and Exam**
> Sunday, November 17, 2019 at the IAEM USA 67th Annual Conference & EMEX 2019, Savannah, GA

Using Location Intelligence for Emergency Management Operations and Response

Ryan Lanclos

Director of Public Safety Industries

Preparing for the new normal requires awareness of increasingly complex threats and hazards, an ability to analyze and understand potential impacts, and the capability to monitor real-time conditions for true situational awareness. Attendees of this session will learn how to prepare for both daily and incident operations by implementing a suite of integrated tools to maintain situational awareness, conduct damage assessment, and manage public information. Using location intelligence, you'll start to see what others can't and be better prepared for life in the new normal.

Esri Disaster Response Program: 25 Years of Lessons Learned Responding to Disasters

Ryan Lanclos

Director of Public Safety Industries

Over the last 25 years, the Esri Disaster Response Program (DRP) has responded to disasters and crises of all types and sizes around the world. During this time, we've learned a tremendous amount about best practices, and how agencies can better prepare for the next disaster — especially when it comes to using modern GIS tools. Learn how the Esri DRP can support you in time of need, see how others are responding with location intelligence, and leave with the three keys to being better prepared in the new normal.

Stephanie Brown
brown@alerrt.org

The Advanced Law Enforcement Rapid Response Training (ALERRT) Center at Texas State University has trained more than 130,000 first responders to active attacks since 2002. In FY18, we trained 30,388 law enforcement, fire, dispatch, and EMS, and 213,704 civilians in integrated active attack response. ALERRT has been named the national standard in active shooter response by the FBI, and has been adopted by state, regional, and local law enforcement training academies as the standard response to active shooters/ attacks around the nation. The ability to deliver training and program support to these first responders and their agencies at no cost, via the federal and state funding we receive is invaluable.
