FEMA Training Roadmap - Emergency Management

A gap was identified in emergency management training guidance. A solution was created to address the need for core competencies, fundamental knowledge, and training path options for all Emergency Managers.

This poster board will lay out 3 education tiers and 4 professional tracks for FEMA programs including course progressions.

The education tiers will be separated based on professional experience, knowledge gain, course format, and time commitment.

Professional tracks included are the Master Exercise Practitioner Program, Emergency Management Professional Program, Continuity Excellence Series, and the Community Emergency Response Team training.

Presentation Theme: Training guidance for current and aspiring EM practitioners

Collaborators, Advisor(s) and Department(s) that assisted with this research:

Individual research. Feedback sought in public forum (LinkedIn) for version 1 to further develop current version 2. No advisors or official support of any kind.
