Emergency Management Coordinator I, Children's Mercy Kansas City

NON-COMPETITIVE DIVISION

Vaccine Clinics Excel at Zero Waste

Come learn the innovative methods and tools that Children's Mercy Kansas City, a pediatric hospital, used to scale its COVID-19 vaccine operations. Attendees will learn more about the three unique tools that allowed the hospital to administer over 45,000 adult vaccines in three months, while achieving zero deliverable waste, and how to implement them in your own operations.

Presentation Theme: This presentation speaks to best practices for preparing for and responding to mass vaccination needs, specifically as it relates to maximizing available resources.
